

HABITAT

Brut Cuvée

The habitat series of wines are sourced from sustainably farmed vineyards (and local vineyards to minimise carbon footprint) in Australia. Winemaking is a natural process that relies on fruit from the grape vine habitat or "terroir" for quality and style.

The first juice of the vintage is reserved for the Habitat brut cuvée. Current release Habitat brut is always a cuvée of older and younger vintage wines so as to optimise both freshness and complexity.

This lively sparkler has lifted lemon and lime aromas. Green apples and citrus flavours are enhanced by zingy acidity and fine bubbles. Light and fresh, this wine finishes with just a hint of yeast. It is the ideal aperitif.
